

# CASTLE WIRING HARNESS 23063

## INSTALL INSTRUCTIONS

### How to Install

1. Unplug the unit's power cord.
2. Remove the side and rear panel closest to the lower circuit board (You may need to remove additional panels as well).
3. Carefully look over the various connections and disconnect each connection one at a time.
4. Replace it with the corresponding connector on the harness. (Refer to the [Wiring Diagram](#) for the connection layout).
5. Reinstall any previously removed panels
6. Plug in the unit's power cord.
