

COMFORTBILT POWER FUSE CB-FUSE

INSTALL INSTRUCTIONS

How to install

1. Unplug the power cord from the main power switch at the rear of the stove.
2. Locate the small plastic tab at the top of the plug housing.
3. Using a small flat head screwdriver pull the tab backward (This should allow the fuse tray to pull free).
4. Once the tray pulls free identify which fuse you want to replace. (The active fuse sits towards the front in the saddle seat. The backup fuse is tucked inside the plastic sleeve just behind it.)
5. Replace the fuse and slide the tray back into place.
