

COMFORTBILT ROOM TEMPERATURE SENSOR CB-THERMOSTATWIRE INSTALL INSTRUCTIONS

How to Install

1. Unplug the stove.
2. Remove the side panel closest to the Temperature Sensor Wire.
3. Follow the Sensor Wire back to the connection located on the board and disconnect it. (Refer to the [Guide to Components](#) for details)
4. Remove the old Temperature Sensor Wire. (Pay special attention to the route this wire follows on its way to the back panel of the stove)
5. Plug in the connector for the new sensor and reroute the wire to follow the same path the old sensor was traveling.
6. Reinstall the side panel.
