QUADRA-FIRE TEST BOX KIT 812-3660
INSTALL INSTRUCTIONS

How to install

1. Disconnect the stove from power.

2. Open the rear access panel to access the control box.

3. Carefully remove the Control Box from the Stove.

4. Insert the Test Box in place of the Control Box and reconnect power to the stove. This will allow you to independently test all the systems of the stove.

5. Once testing is finished, and after any issues found are resolved, disconnect the control box.

6. Connect the control board to the stove and proceed to close the rear access.
