

WHITFIELD PRESSURE SWITCH 16050001

INSTALL INSTRUCTIONS

How to install

1. Unplug the stove.
2. Open the wiring access panel on the side or rear of the stove.
3. Locate the switch on the side of the stove where the combustion/exhaust fan assembly is located.
4. Disconnect the hose and the two wires from the switch.
5. Remove the two screws that connect to the mounting bracket to remove the old switch.
6. Install your new switch, mount in place with screws.
7. Reconnect the wires and hose. It does not matter which wire goes on to which terminal.
8. Close the wiring access panel on the stove.
